

LINDSEY THOMAS

FULL STACK SOFTWARE ENGINEER

* timidgeek.com/
Tulsa, Oklahoma
timidgeek@yahoo.com

Software Engineer with experience building customer-facing applications across web and mobile platforms. Skilled in React, TypeScript, JavaScript, responsive design, and reusable component architecture, with a focus on creating intuitive user experiences from concept through implementation. Skilled in translating Figma mockups into polished, production-ready interfaces. Passionate about thoughtful product development, design systems, and building polished software that helps people accomplish real-world goals.

EDUCATION

Computer Science & Full Stack Web Development Diploma | Atlas School Tulsa | Spring 2024

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, SQL, HTML5, CSS3, SCSS

Frameworks: React, React Native, Next.js, ASP.NET, Node.js, Tailwind CSS, Bootstrap

Cloud & Databases: AWS (Lambda, Cognito, DynamoDB, CloudWatch), Azure File Share, MS SQL Server

Payments & APIs: REST APIs, OAuth 2.0, ACH, MQTT, Plaid

Tools: Git, Figma, Adobe Creative Suite, Xcode, Android Studio, Claude, Capacitor

WORK EXPERIENCE

Software Developer | ATM One Inc. | Jan 2026 - Present

- Engineered full-stack fintech applications spanning React web applications, Android, cloud services, and backend systems for a cash access platform.
- Designed and delivered customer-facing applications using Next.js, React, TypeScript, Tailwind CSS, AWS Cognito, DynamoDB, and .NET within fast-paced release cycles.
- Built integrations with financial services and third-party APIs, including ACH payments, gift card processing, referral systems, and MQTT terminal communication while improving transaction reliability and debugging production issues.
- Collaborated cross-functionally to design user workflows, modernize interfaces, and deliver scalable financial products with a focus on security and user experience.

Front End Web Developer | Spherexx | June 2024 - Dec 2025

- Architected and developed custom web solutions, reusable UI components, and scalable template systems supporting client websites and internal workflows. Stack included heavy use of vanilla Javascript and CSS/SCSS.
- Built 8+ production-ready templates, developed reusable UI modules, and maintained documentation for a 100+ component library to improve development consistency and efficiency.
- Translated Figma wireframes and design concepts into responsive, accessible user interfaces while modernizing legacy ASP applications through platform migrations and ADA-compliant improvements.
- Contributed to front-end standards, documentation, and code quality practices to support maintainable development and reduce technical debt.
